

IMPORTANT PRE-INSTALLATION CHECKLIST – R3 ALL VERSIONS

Our shop will discuss this form with you while you are placing your order. If necessary you are welcome to take the form away and discuss the points raised with your contractors.

If you take the form away with you, please return the completed copy to your AGA store at your earliest convenience. This will assist us with finalizing your installation.

	Questions	Y	N	Additional Information
Access and parking	<p>Can the property be accessed by a 7.5 ton lorry with a tail lift 2415mm (8ft 3in) wide?</p> <p>Are there any special permissions or permits required?</p>			
Route for delivery	<p>Is there a clear route into the kitchen?</p> <p>The minimum gap needed is 650mm through doors and hallways.</p> <p>Please give details or any steps, gravel areas, grass areas, uneven surfaces, obstacles, tight turns.</p> <p>If you have any concerns about the access route please contact your local AGA store as soon as possible.</p>			
Route for delivery	<p>Is any floor protection needed?</p> <p>Will there be any additional man power on site when we arrive?</p>			
Floor	<p>What flooring is under the cooker position?</p> <p>The cooker is positioned using wheels. Please lay your flooring before the cooker is fitted or fit a suitable plinth to ensure the base and flooring in the room are level with each other.</p> <p>The flooring must be capable of supporting the weight of the cooker.</p> <p>The cooker base dimensions, weights and clearances can be found on pages 37-41 (cooker version dependent) of your installation instructions</p>			

IMPORTANT PRE-INSTALLATION CHECKLIST – R3 ALL VERSIONS

Position	<p>Will the cooker be positioned between base units?</p> <p>Will the cooker be positioned onto an empty wall? If so please ensure this is marked to enable us to correctly position the cooker.</p> <p>Will the cooker be going into an alcove or recessed area? If so, electrical switches cannot be located above or behind the cooker. They must be outside of the recess following the distances advised in our instructions.</p> <p>Is there space for a 3mm gap to be left each side of the cooker top plate?</p> <p>Is there space for a 60mm gap to be left above the lid handles to allow for opening?</p> <p>Is the cooker going against a side wall? If so additional clearances will be needed</p> <p>The cooker dimensions and clearances can be found between pages 37-41 (cooker version dependent) of the installation instructions.</p>			
Rear Wall	<p>Is the rear wall clear of pipes, wires, drains and other services?</p> <p>The rear wall must be clear of any obstructions.</p> <p>How much gap do you need left behind the cooker position?</p> <p>The minimum 14mm gap will be left between the top plate and finished surface behind. However, if you will be tiling or fitting anything behind afterwards we will need to know how much extra space will be required. The minimum 14mm gap must be left open and uncovered.</p> <p>More details on this are shown between pages 40-41 of the instructions.</p>			
Worktop	<p>The cooker hotplate height is 913mm off the finished floor. Will your surrounding surfaces match this height?</p> <p>The cooker dimensions can be found between pages 37-39 (cooker version dependent) of the installation instructions.</p>			
Electrics (Twin Hotplate option)	<p>Where are you planning on positioning your electrical connections?</p> <p>The AGA requires 2 x 13amp switched fused spurs within 2m of the cooker and in the same room. These must not be above or behind the cooker and must be accessible.</p> <p>Your electrician may connect these into connection points near to the cooker. If connection points are required, these must be within 2.5m either side of the rear bottom corners. The connection points can be behind the AGA as long as they are lower than 450mm from the finished floor.</p> <p><u>Important</u> - 3 pin plug sockets are not suitable for this model.</p> <p>Full details of this can be found between pages 41-42 (cooker version dependent) of the installation instructions</p>			

IMPORTANT PRE-INSTALLATION CHECKLIST – R3 ALL VERSIONS

Electrics (Single Hotplate + Induction Unit Option)	<p>Where are you planning on positioning your electrical connections?</p> <p>The AGA requires 2 x 13amp connections within 2m of the cooker and in the same room. The first <u>must</u> be a switched fuse spur. The second can either be a switched fused spur or a 3 pin plug socket. These must not be above or behind the cooker and must be accessible.</p> <p>Your electrician may connect these into connection points near to the cooker. If connection points are required, these must be within 2.5m either side of the rear bottom corners. The connection points can be behind the AGA as long as they are lower than 450mm from the finished floor.</p> <p>Full details of this can be found between pages 41-42 (cooker version dependent) of the installation instructions</p>			
Electrics (150 160 170 Fan Oven Unit)	<p>Where are you planning on positioning your electrical connections?</p> <p>The conventional fan oven unit connects using either a three pin plug and socket or a 13amp switched fuse spur. This must be within 2m either side of the rear bottom corners. This cannot be behind the cooker position.</p> <p>Your electrician may connect these into connection points near to the cooker. If connection points are required, these must be within 2.5m either side of the rear bottom corners. The connection points can be behind the AGA as long as they are lower than 450mm from the finished floor.</p> <p>Full details of this can be found between pages 42-43 (cooker version dependent) of the installation instructions</p>			
<p>Please provide any additional information which may be relevant to the delivery or installation of the appliance</p>				
<p>Occasionally certain circumstances may dictate that we will be unable to deliver your product using our standard delivery service. Should an external specialist team be required we will advise you in advance of any additional costs you may incur before we proceed with your delivery.</p> <p>A copy of this delivery and installation checklist should be returned to your store at the time of placing your order. Please retain a copy to assist you with preparing for your AGA installation.</p> <p>If you have any queries once your order has been placed please feel free to contact your local AGA store for further assistance.</p> <p>If a delay is required to your installation date we need a minimum of five working days' notice before the agreed date. Failure to provide this notice may incur a charge.</p>
